

ABSTRACT OF THE DISCLOSURE

An illuminating apparatus according to the present invention comprises a controller, a power supply cable and a plurality of light-emitting units. The plurality of light-emitting units shown are a first light-emitting unit, a second light-emitting unit, a third light-emitting unit, a fourth light-emitting unit, a fifth light-emitting unit, a sixth light-emitting unit, a seventh light-emitting unit and an eighth light-emitting unit. Each light-emitting unit is provided with a red LED, a green LED and a blue LED. A diode is connected to the red LED whose forward voltage is lower.
